SERIES RPS

Ventomat Series RPS 50 mm Air release and vacuum breaking

Caution

The VENTOMAT valve is specifically designed to limit the large discharges associated with the large orifice .

When evaluating the large orifice performance of **other valve manufacturer** ask specifically if the large orifice discharge data quoted is in the presence of water . In other words if the discharge performance is quoted as say 400 meters cubed / Hr @ 0.8 Bar the valve must be able to close instantaneously with water and still not exceed its max test pressure rating of 24 Bar (1.5 times working pressure)
